7- Environmental Conservation and Biodiversity Protection Policy

- **Policy Statement:**

The University recognizes its responsibility to protect the environment and conserve biodiversity, integrating these principles into its operations, curriculum, and community engagement.

- **Actionable Measures:**

- **Green Campus Master Plan:** Develop and maintain a Green Campus Master Plan that maps and protects green areas, sets targets for increasing green cover, and plans for sustainable expansion.
- **Chemical Management:** Establish a central, university-wide registry for all hazardous chemicals and ensure their safe disposal according to international environmental standards.
- **Biodiversity Action Plan:** Create a specific plan to monitor and enhance on-campus biodiversity, including creating insect hotels and pollinator gardens.
- **Curriculum Integration:** Incentivize and support academic departments to incorporate environmental conservation and sustainability modules into their curricula

**Vice President for Academic
Affairs**

(Prof. Nancy Assad)
