

Veterinary Clinic in Menoufia National University

The **Veterinary Clinic at Menoufia National University**, recently inaugurated in August 2025, represents a significant step toward enhancing animal health services, food safety, and community well-being. The clinic provides **diagnostic, preventive, and therapeutic care** for both domestic and farm animals, contributing to the control of infectious diseases and the protection of public health under the **One Health** approach.

It also serves as a **hands-on training center** for students in veterinary medicine, allowing them to gain practical experience in clinical diagnosis, animal surgery, and welfare management. This experiential learning supports **SDG 4: Quality Education**, preparing highly skilled graduates capable of serving their communities.

As part of its community outreach and sustainability mission, the university is **preparing to extend the clinic's services to neighboring rural villages**, offering veterinary care, awareness programs, and animal vaccination campaigns. This initiative contributes to **SDG 2: Zero Hunger**, **SDG 3: Good Health and Well-Being**, and **SDG 15: Life on Land**, reflecting Menoufia National University's dedication to **animal welfare, sustainable agriculture, and rural development**.
