

جامعة المنوفية الأهلية

## 9 - Sustainable Energy and Water Management Policy

### - Policy Statement:

The University is dedicated to the efficient and sustainable use of energy and water resources to minimize its environmental footprint and operational costs.

### - Actionable Measures:

- **Infrastructure Upgrade:** Implement a phased plan to retrofit all campus buildings with LED lighting, water-efficient faucets and toilets, and smart irrigation systems for landscapes.
- **Renewable Energy Investment:** Install solar panels on the rooftops of new buildings and large facilities like the student hostel and sports complex to generate clean electricity.
- **Behavioral Campaigns:** Launch a "Switch Off" campaign encouraging students and staff to turn off lights and equipment when not in use, and report leaking taps immediately via a dedicated maintenance hotline.
- **Monitoring & Targets:** Set annual reduction targets (5% per year) for electricity and water consumption and publicly report progress in the University's annual sustainability report.

**Vice President for Academic  
Affairs**

**(Prof. Nancy Assad)**
